Fire ant bait

syngenta.

EXTINGUISH YOUR FIRE ANT

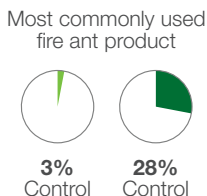

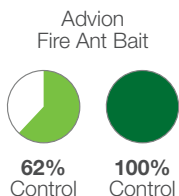

367 MILLION ACRES ARE INFESTED WITH FIRE ANTS IN THE U.S.^{1, 2}

4 REASONS WHY WE USE ADVION FIRE ANT BAIT:

1

FASTEST RESULTS AVAILABLE: We use Advion® Fire Ant Bait and research shows that Advion controls foraging worker ants within 12 to 48 hours and delivers total colony control within 72 hours³—allowing you to get back to enjoying your lawn without the threat of painful stings. The most commonly used insecticide product can take 4-6 weeks to provide control.

2

FIRE ANTS SEEK OUT OUR PRODUCT LIKE FOOD: Our bait product is attractive to fire ants. They will actively seek it out and take it back to the entire colony to eat (including the queen) for total colony control.

3

NO NEED TO WATER-IN: Other commonly used insecticides need to be watered-in to become effective. This step isn't necessary with Advion Fire Ant Bait. In fact, it works best if no water is present.

4

BAITS ARE EFFECTIVE WITH LESS INSECTICIDE: Our product has 18.4 times less active ingredient per acre than the most commonly used fire ant product.

PROBLEM IN JUST 72 HOURS

40

million people live in fire ant-infested areas.⁴

14

million people are stung annually.⁵

HOW TO SPOT A FIRE ANT INFESTATION:

Fire ants live in dome-shaped mounds built in yards, pastures and gardens. They also nest under patios, around stumps and trees, beneath sidewalks, driveways, foundations and electrical boxes.

Fire ants reproduce in the spring and fall. The queen can produce 500,000 ants in a single colony.

3
YEARS

is the average lifespan of a queen fire ant.⁶

5
T

is the lifespan of a worker ant.⁷

3 THINGS THAT ATTRACT FIRE ANTS:

Oily and greasy food

Pet food

Fire ant bait
