

# Our flexible herbicide options can help you manage weather challenges

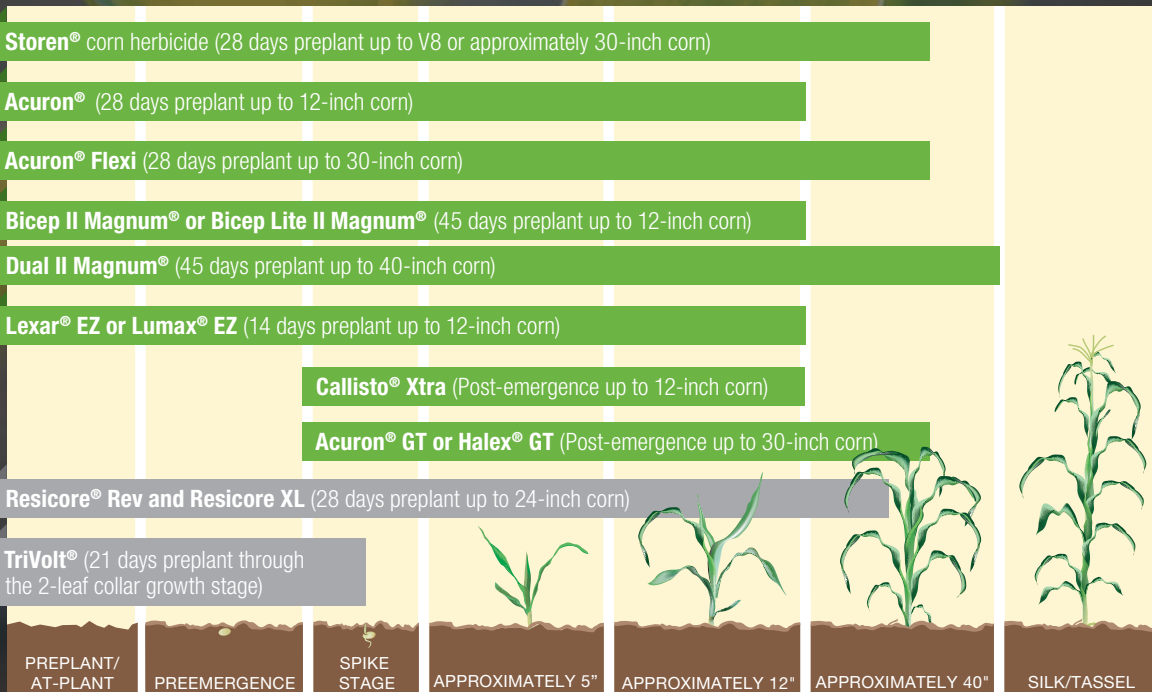

Almost every year, the Corn Belt faces challenges with wind, rain and change to extreme temperatures. Our robust lineup of flexible, crop safe corn herbicides allows you to confidently go up to bat against any of Mother Nature's curveballs and protect your crop from yield-robbing weeds.

## Application Flexibility

While the optimal herbicide application timing is preemergence to prevent early-season weed competition, you can have peace of mind knowing many of our corn herbicides can be applied both preemergence and post-emergence if weather delays keep you out of the field.

## Corn Growth Stage and Herbicide Application Timing

# Long-Lasting Residual

If you've already applied Acuron, Storen, Lexar EZ or Lumax EZ and are now facing planting delays, you may wonder if your weed control will run out too soon, but these products offer long-lasting residual control without carryover that exceeds other herbicides when applied at a full-use rate.\* Storen alone provides maximum residual control up to **3 weeks longer** than other leading corn herbicides for clean rows and clear results.\*\*

## Storen® 2.4 qt/A + AAtrex® 4L 1 qt/A

Key AI: Bicyclopyrone  
Other AIs: Mesotrione, S-metolachlor and Pyroxasulfone + Atrazine

## Resicore® XL 2.75 qt/A + AAtrex 4L 1 qt/A

Key AI: Mesotrione  
Other AIs: Acetochlor and Clopyralid + Atrazine

## TriVolt® 20 fl oz/A + AAtrex 4L 1 qt/A

Key AI: Isoxaflutole  
Other AIs: Flufenacet and Thiencarbazone-methyl + Atrazine

Source: Rend Lake, IL; 2023

## Crop Safety

Our corn herbicides can be trusted to deliver excellent preemergence and post-emergence crop safety even in adverse weather conditions when used according to the label.

## Syngenta corn herbicides containing proven crop safeners:

\*If a significant rainfall does not occur within 7 days after application, weed control may be decreased.

\*\*Storen length-of-control advantage based on 2022 Syngenta and university-replicated trials comparing Storen to Resicore® and TriVolt®.

For questions about our corn herbicide portfolio, ask your local Syngenta retailer or sales representative, contact the Syngenta Customer Center at 1-866-SYNGENT(A) or visit [Syngenta-US.com](https://www.syngenta-us.com).
