

Cropwise
Explorer

Connect with your Growers' Crops

Cropwise™ Explorer leverages historical and in-season crop data to empower you to make data-driven decisions, helping unlock better outcomes and more effective crop management. It is an intuitive and simple tool that doesn't require extensive technical expertise. You can easily visualize your growers' fields and tailor your recommendations to the field's unique needs.

Key Benefits:

- Maximize in-field time and your resources
- Monitor multiple fields from anywhere
- Build customer trust in your recommendations by analyzing what is working and what isn't
- Discover insights about the fields and react to potential agronomic threats sooner
- Easily store and access data from your grower's fields at any time
- Maintain ownership of your data
- Engage with Syngenta Digital for season-long support on setup, training and advice

Cropwise Explorer offers a variety of features, so you can see and share what matters most to you and your customers:

PRODUCTIVITY MAPS	Analyzes the best images from 10 years of NDVI imagery to generate multi-year productivity zones in seconds.
SATELLITE IMAGERY	Captures high-resolution images, which can be downloaded for offline use.
ANOMALY DETECTION	Monitors, identifies and notifies you when and where anomalies arise within the field*.
YIELD ANALYSIS	Examines yield at the property and field level to identify areas of low or high productivity and investigate issues and their causes for after-harvest analysis, reporting and planning for next season.
WEEKLY FIELD INSIGHTS REPORTS	Consolidates critical field-health data into an easy-to-understand weekly report that visualizes progress across multiple fields.
DATA LAYERS	Shows operational data – planting, spraying and harvesting information – right next to satellite images of each field.
SOIL SURVEY GEOGRAPHIC DATABASE (SSURGO) SOIL MAPS	Helps you avoid mismatching varieties or inputs with the wrong soil type and gain insights on the impact of soil type on yield performance.
VARIABLE RATE PRESCRIPTIONS	Enables you to avoid over/under applying inputs using last year's data and in-season imagery and address in-field variability.
A PART OF THE CROPWISE PLATFORM	Compatible with the Cropwise integrated farm management technology platform, so there is one log-in to use across your digital ag experience.

To learn more about how Cropwise Explorer can fit into your operation, reach out to your Syngenta representative or visit Cropwise.com/US/Explorer.
