

## *Poa annua* Guarantee Program for Overseeded Fairways

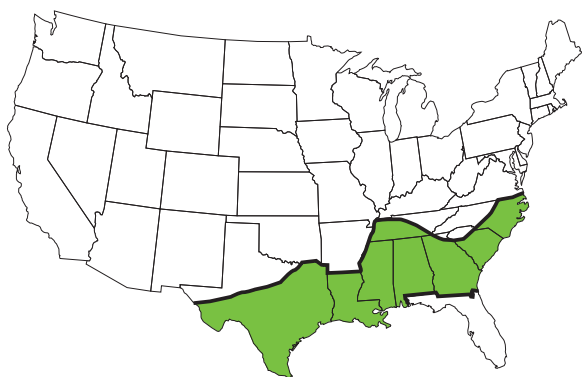

The key to protecting your overseeded fairways from *Poa annua* is to use a highly effective herbicide and growth regulator program. Barricade<sup>®</sup> herbicide plus Trimmit<sup>®</sup> 2SC plant growth regulator will provide outstanding efficacy when used as directed.

- Barricade delivers excellent preemergent control with a long-lasting residual.
- Apply Trimmit 2SC herbicide 60 days after perennial ryegrass overseeding. This will help stop any emerged *Poa annua*. Trimmit 2SC also reduces clippings while enhancing perennial ryegrass quality.

### Here's your Guarantee:

- Follow the prescribed solution below on a minimum of 20 acres of bermudagrass on your golf course per 18 holes (or 10 acres if on a nine-hole course) to qualify for the Guarantee Program described herein.
- If you achieve less than 90% *Poa annua* control on your treated acreage, contact your Syngenta territory manager immediately for analysis.
- Claims must be filed by April 17, 2024 with a Syngenta territory manager.

### **SOUTH** OVERSEEDED FAIRWAYS (GA, AL, MS, SC, LA, NC, TN and TX only)

#### For Texas:

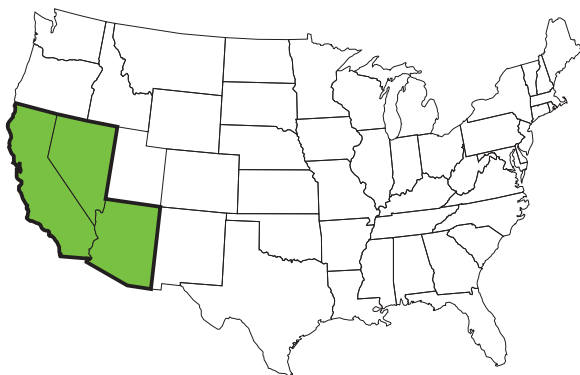

- Six to eight weeks prior to overseeding, apply Barricade at 0.5–0.65 lb. a.i./A.
- Four to eight weeks after overseeding when roots are in the second inch of soil, re-apply Barricade to total 0.85 lb. a.i./A.
- Trimmit 2SC applications at 8–10 oz./A should begin at 85% cover, but no sooner than 60 days after overseeding. Use three applications at 30-day intervals.

#### For Alabama, Louisiana, Georgia, Mississippi, North Carolina, South Carolina and Tennessee:

- Apply Barricade at 0.5–0.65 lb. a.i./A eight to ten weeks prior to overseeding.
- In Jan., apply Barricade at 0.5 lb. a.i./A.
- Trimmit 2SC applications at 8–10 oz./A should begin at 85% ryegrass cover, but no sooner than 60 days after overseeding. Use two to three applications up to March 15.

*For complete details, please see product labels.*

## WEST OVERSEEDED FAIRWAYS (AZ, CA, NV only)

### For Arizona, California and Nevada:

- Six to eight weeks prior to overseeding, apply Barricade at 0.5–0.65 lb. a.i./A.
- Four to eight weeks after overseeding when roots are in the second inch of soil, re-apply Barricade to total 0.85 lb. a.i./A.
- Trimmit 2SC applications at 8–10 oz./A should begin at 85% cover, but no sooner than 60 days after overseeding. Use three applications at 30-day intervals.

*For complete details, please see product labels.*

#### Program Terms and Conditions

The minimum application area for golf courses is 20 acres per 18 holes (or 10 acres if on a nine-hole course). Only the use of Barricade 65WG and Barricade 4FL will be permitted. User must follow prescribed guidelines herein regarding application rates and timing for the user's region in order to qualify. All claims must be submitted by April 17, 2024. Purchases of Qualifying Products must be made between July 1, 2023 and Dec. 31, 2023 ("Qualifying Period") from an Authorized Syngenta Agent or Retailer. If you notify your Syngenta territory manager of a *Poa annua* breakthrough, your Syngenta territory manager will investigate and, if warranted, supply Syngenta products for rescue treatment with a value not to exceed the value of the Barricade herbicide products already purchased and applied by user on the applicable acreage this season. A "breakthrough" is defined as less than 90% *Poa annua* control as compared to untreated areas of similar turf density, turf type and environment. A Syngenta determination as to whether 90% control exists will be final. Syngenta retains the right to audit purchase records in assessing claims. Syngenta will not pay for any application for rescue treatments. Syngenta reserves the right to modify or discontinue this Guarantee Program. The Guarantee is offered in Alabama, Arizona, California, Georgia, Louisiana, Mississippi, North Carolina, Nevada, South Carolina, Tennessee and Texas only.
