Keeping your greens and fairways protected during the winter months is critical. Instrata fungicide is the foremost product for protection against pink and gray snow mold as well as preventing spring pressure of diseases such as anthracnose. By combining three active ingredients, **Instrata at a rate of 9.0–11.0 fl oz per 1,000 ft<sup>2</sup>** outperforms conventional snow mold products.

### New Level of Snow Mold Control for Fairways.

Untreated

Tees + Fairways	Up to 90 days of control	Tuque exoGEM 2.87 fl oz per 1,000 ft <sup>2</sup>

\* (2) 5.5 fl oz applications or (1) 11 fl oz application.

### Key Agronomic Practices:

- Give your snow mold application an advantage by utilizing a fall clean-up application to control cool-season disease
- Summer stresses, such as plant diseases, take a toll on turfgrass health, give your turfgrass the best chance for recovery with properly timed clean-up and snow mold applications
- Apply snow mold applications prior to snowfall
- Additional applications may be necessary in absence of permanent snow cover
- Apply in a minimum carrier volume of 50 gallons of water per acre on fairways and tees, and 90 gallons of water per acre for putting greens
- For enhanced turf quality and improved color as the snow melts, tank mix a pigment in the above recommendations. Pigments elevate visual turf quality after snow melt, and the color boosts turf recovery and growth coming out of dormancy in the spring.

Winter Protection Solution	Posterity XT + Ascernity Multipak	Tuque exoGEM Fungicide
5 cases - Posterity XT* + Ascernity Multipaks 10 gl - Instrata fungicide Treats 15 acres of fairways & 3 acres of greens <i>*To achieve 3 fl oz rate of Posterity XT the additional of 2.5 gls is required</i>	2.5 gl Posterity XT 1 gl Ascernity Used in combination to treat 3 acres	2x2.5 gl 2.5 gl treats 2.55 acres 2.87 fl oz per 1000 ft <sup>2</sup>

### Syngenta Snow Mold Guarantee Program Terms and Conditions

User must follow prescribed guidelines herein regarding application rates and timing for the user's region. Instrata, Tuque exoGEM, Winter Protection Solution, Posterity XT & Ascernity brand purchases and product applications must be made between August 1, 2023 and December 8, 2023 ("Qualifying Period"). All claims must be reported to and submitted in writing to your Syngenta territory manager within two (2) weeks after snow melt and no later than April 15, 2024. In the event you notify your Syngenta territory manager of snow mold Breakthrough exceeding 15%, your Syngenta territory manager will investigate and, if warranted, supply Syngenta products for rescue treatment with a value not to exceed the value of the Syngenta products already purchased and applied by user on the applicable acreage during the Qualifying Period. A "Breakthrough" is defined as more than 15% occurrence of snow mold control as compared to untreated areas of similar turf density, turf type, and environment at the discretion of the Syngenta territory manager and the user. Syngenta's determination as to whether less than acceptable control exists will be final. Syngenta retains the right to audit purchase records in assessing claims made pursuant to the Guarantee. Syngenta will not pay for any application for rescue treatments. Cultural practices, mechanical issues or any other factors that are deemed contrary to standard practices and methods for preventive snow mold control will render the claim ineligible. Syngenta reserves the right to modify or discontinue this Guarantee at any time without prior notice.

### Terms and Conditions

- Prices and terms for the products purchased from Syngenta through a Syngenta Authorized Agent are determined by Syngenta.
- Syngenta reserves the right to modify or discontinue this Guarantee Program at any time.
- Contact a Syngenta Authorized Agent for official terms and conditions.
