

Two forms of control. One application. Better looking turf.

Caravan® G is the first-ever broad-spectrum fungicide/insecticide granular combination. By pairing the proven control of Heritage® fungicide and Meridian® insecticide, Caravan G allows you to control a broad range of insect and disease pests including white grubs and brown patch with one application, saving you time and money. Use Caravan G on residential and commercial lawns, golf courses and athletic fields and let its systemic disease and insect control help you create better looking turf.

Not just grub control. Not just disease control. Better looking turf.

Brown Patch Evaluation on Perennial Ryegrass, Syngenta Vero Beach Research Center. Photos taken 24 days after inoculation on April 24, 2012.

Treat for the broadest possible range of pests in a single visit.

One application means half the fuel, labor and additional overhead costs required to achieve the same revenue and control. Caravan G delivers the best of Heritage fungicide and Meridian insecticide.

- Caravan G controls more than 20 turfgrass diseases including brown patch, red thread, *pythium* blight, and leaf spot. Early season application can prevent brown patch for up to one month.
- Caravan G also controls numerous insects such as white grubs, chinch bugs, sod webworms and ants. It has a wide application window and relaxed watering requirements, effective even if there is no rain or irrigation for up to one week after application.
- While timing and geographies will vary, one application of Caravan G made between May 15 and July 15 can yield season-long grub control and up to one month of brown patch prevention. For additional disease control, follow-up applications can be made with Heritage G or Headway® G fungicides.

Compare Caravan G to Merit® insecticide on fertilizer

| Pest | Caravan G | Merit 0.2% on Fertilizer |
|------------------|------------------|--------------------------|
| Grubs | + | + |
| Chinch bugs | + | Suppression only |
| Sod Webworms | + | Not listed on label |
| Ants* | + | Not listed on label |
| Bill bugs | + | + |
| Crane flies | + | + |
| Mole crickets | Suppression only | + |
| Japanese beetles | + | + |

* Excluding Carpenter, Fire, Harvester and Pharaoh ants

The effectiveness of a spray. The convenience of a granular.

Caravan G is ready-to-use for a cost-effective spot or full yard treatment, allowing professionals to treat the broadest range of lawn-damaging insects and diseases in a single visit.

- Its highly water-soluble, quick-release carrier is activated by light irrigation or heavy dew to move the active ingredients throughout the turf plant.
- The low-dust granular with a quick-release carrier eliminates time and costs associated with water access, cumbersome mixing and additional personal protection equipment required with liquid applications.
- One resealable bag conveniently treats up to 15,000 ft.²

White Grub Control

| Diseases* | | Insects |
|---------------------------|-------------------------|--------------------|
| Anthracnose | Pythium blight | White Grubs |
| Brown patch | <i>Pythium</i> root rot | Chinch bugs |
| Yellow patch | Red thread | Ants** |
| Gray leaf spot | Large patch | Craneflies |
| Leaf spot | Summer patch | Billbugs |
| Melting out | Take-all patch | Japanese beetles |
| Necrotic ring spot | Zoysia patch | Sod webworms |
| Pink patch | | |

* See label for full list of pests
 ** Excluding Carpenter, Fire, Harvester and Pharaoh ants
