### Broadly Adapted Dual-Purpose Hybrid with Excellent Grain Yield and Corn Silage Potential

- Dependable emergence allows for early planting
- Shorter plant height with good silage tonnage and quality potential
- Likely to respond to a foliar fungicide application

Seed products with the LibertyLink® (LL) trait are resistant to the herbicide glufosinate ammonium, an alternative to glyphosate in corn and soybeans, and combine high-yielding genetics with the powerful, non-selective, postemergent weed control of Liberty® herbicide for optimum yield and excellent weed control.

Ratings are based on interpretation of statistically analyzed results of studies conducted by Syngenta and may change as additional data are gathered.
