### Excellent Performances Across Moderate and High Yield Environments

- Strong emergence coupled with excellent vigor allows for superb early stand establishment
- Sound agronomic package, with improved root strength and green snap tolerance for RM
- For optimum product performance potential, consider a fungicide application

Seed products with the LibertyLink® (LL) trait are resistant to the herbicide glufosinate ammonium, an alternative to glyphosate in corn and soybeans, and combine high-yielding genetics with the powerful, non-selective, postemergent weed control of Liberty® herbicide for optimum yield and excellent weed control.

Ratings are based on interpretation of statistically analyzed results of studies conducted by Syngenta and may change as additional data are gathered.
