### Elite Performance Potential with Consistency in Moderate and High Yield Environments

- Dependable emergence and early-season vigor for strong stand establishment
- Solid agronomics highlighted by season-strong roots
- Excellent performance potential across soil types with good standability

Seed products with the LibertyLink® (LL) trait are resistant to the herbicide glufosinate ammonium, an alternative to glyphosate in corn and soybeans, and combine high-yielding genetics with the powerful, non-selective, postemergent weed control of Liberty® herbicide for optimum yield and excellent weed control.

Ratings are based on interpretation of statistically analyzed results of studies conducted by Syngenta and may change as additional data are gathered.
