Consistent Yield Potential with Broad Adaptation for the Central and Eastern Corn Belt

- Great emergence with excellent vigor to keep it going strong
- Strong agronomics with season-long standability for greater peace of mind
- Medium plant stature for improved residue management

Seed products with the LibertyLink® (LL) trait are resistant to the herbicide glufosinate ammonium, an alternative to glyphosate in corn and soybeans, and combine high-yielding genetics with the powerful, non-selective, postemergent weed control of Liberty® herbicide for optimum yield and excellent weed control.

Ratings are based on interpretation of statistically analyzed results of studies conducted by Syngenta and may change as additional data are gathered.
