### Great Yield Potential with Very Good Test Weight

- Solid roots with outstanding performance in poorly drained soils
- Strong emergence warrants as an early-planting option
- A reliable disease package protects the yield potential

Seed products with the LibertyLink® (LL) trait are resistant to the herbicide glufosinate ammonium, an alternative to glyphosate in corn and soybeans, and combine high-yielding genetics with the powerful, non-selective, postemergent weed control of Liberty® herbicide for optimum yield and excellent weed control.

Ratings are based on interpretation of statistically analyzed results of studies conducted by Syngenta and may change as additional data are gathered.
