Very Strong Yield Potential with a Wide Area of Adaptation

- Remarkable emergence launches this hybrid out of the ground
- Population flexibility with solid agronomics allows for Western movement
- Powered by Artesian technology, providing dependable performance across environments

Seed products with the LibertyLink® (LL) trait are resistant to the herbicide glufosinate ammonium, an alternative to glyphosate in corn and soybeans, and combine high-yielding genetics with the powerful, non-selective, postemergent weed control of Liberty® herbicide for optimum yield and excellent weed control.

Ratings are based on interpretation of statistically analyzed results of studies conducted by Syngenta and may change as additional data are gathered.
