Outstanding Yield Potential with Stability Across Changing Soil Types

- Strong emergence and seedling vigor propel this product out of the ground
- Dependable roots and stalks for late-season standability
- Maintains tip fill and kernel depth for consistent yield potential

Seed products with the LibertyLink® (LL) trait are resistant to the herbicide glufosinate ammonium, an alternative to glyphosate in corn and soybeans, and combine high-yielding genetics with the powerful, non-selective, postemergent weed control of Liberty® herbicide for optimum yield and excellent weed control.

Ratings are based on interpretation of statistically analyzed results of studies conducted by Syngenta and may change as additional data are gathered.
