

SOYBEANS

NK31-J9XF_{BRAND}

NEW

RM:
3.1

VERSATILE PRODUCT WITH EXCEPTIONAL PERFORMANCE

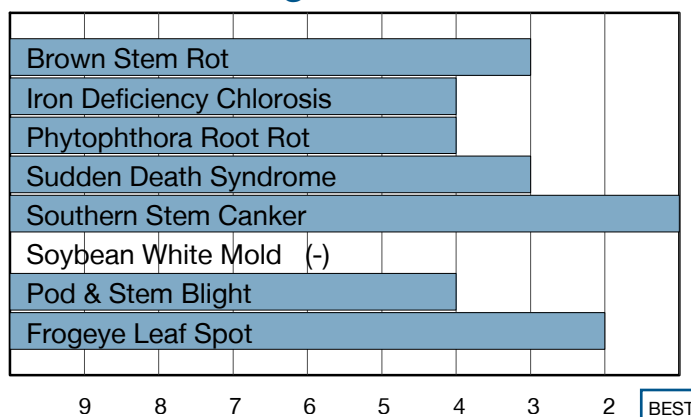

- Best performance in high-yielding environments
- Handles any soil type, texture or drainage situation
- Solid Sudden Death Syndrome tolerance with the Frogeye gene to protect bushels

Plant Characteristics

Plant Height	Tall
Canopy/Plant Type	Medium-Thin
Branching	Moderate
Growth Habit	Indeterminate
Flower Color	Purple
Pubescence Color	Light Tawny
Pod Color	Tan
Hilum Color	Black
Chloride Sensitivity	Includer

Disease Ratings

Agronomic Traits

Emergence	3
Standability	4
Shatter Tolerance	-
Green Stem	3
Estimated Seed Size	Medium
% Protein at 13% mst.	32.8
% Oil at 13% mst.	19.6
Narrow Rows	2
Wide Rows	2

Adaptation to Soil Types

Drought Prone	Good
High pH*	Fair
Highly Productive	Best
Moderate/Variable Environments	Good
Poorly Drained	Good

Diseases and Pests

Phytophthora Root Rot (PRR) Source	Rps1k
Soybean Cyst Nematode (SCN) Races	MR3
(SCN) Source	PI88788
Root Knot Nematode (RKN) Incognita	-

syngenta.

Ratings are based on interpretation of data gathered by Syngenta and/or observations across areas of adaptation and may change as additional data are gathered. Product performance assumes disease presence.

©2021 Syngenta. Important: Always read and follow label and bag tag instructions; only those labeled as tolerant to glufosinate may be sprayed with glufosinate ammonium-based herbicides. NK® Soybean varieties are protected under granted or pending U.S. variety patents and other intellectual property rights, regardless of the trait(s) within the seed. The LibertyLink® and XtendFlex® traits may be protected under numerous United States patents. It is unlawful to save soybeans containing these traits for planting or transfer to others for use as a planting seed. Under federal and local laws, only dicamba-containing herbicides registered for use on dicamba-tolerant varieties may be applied. See product labels for details and tank mix partners. Only dicamba formulations that employ VaporGrip® Technology are approved for use with XtendFlex® soybeans. VaporGrip® is a trademark of, and used under license from, Monsanto Technology LLC. XtendFlex® is a registered trademark used under license from the Bayer Group. LibertyLink®, Liberty® and the Water Droplet logo are registered trademarks of BASF. The trademarks or service marks displayed or otherwise used herein are the property of a Syngenta Group Company. All other trademarks are the property of their respective owners.

1-9 Scale: 1 = Best, 9 = Worst, (-) = Not Available, NA = Not Applicable.

Adaptation to Soil Types: Best > Good > Fair > Poor; (-) = Not Available.

* Represents an assessment of stand establishment, chlorosis severity and yield performance

Published May 04, 2021. For use until April 30, 2022.

Seed products with the LibertyLink® (LL) trait are resistant to the herbicide glufosinate ammonium, an alternative to glyphosate in corn and soybeans, and combine high-yielding genetics with the powerful, non-selective, postemergent weed control of Liberty® herbicide for optimum yield and excellent weed control.
